OUR DREAM

Where a child is born should not define where they end up.

$R^2=0$ — conditions at birth with no predictive power over someone's future earnings.

AI is the first change in a generation that substantially alters what a school and a state can do. Governments cannot take the risk of finding out what works, and markets will not fund what has no buyer yet. **We take both risks to find disruptive, scalable solutions.**

WHERE Our five priority countries: **Brazil · Colombia · Costa Rica · Peru · Uruguay**.

SUCCESS IN 2031 Our models scaled up, spun off and adopted by governments and markets.

OUR STANCE ON AI Ambitious about AI's potential, rigorous about its evidence, and committed to human agency, safety and equal opportunity.

TWO AREAS OF WORK

EDUCATION & TECH

Backing AI-enabled education innovation that measurably improves learning and economic opportunity

For-profit and not-for-profit alike, in AI- and preferably B2G-driven solutions, from early childhood to higher education.

PUBLIC LEADERSHIP AND INNOVATION

Equipping people in government to leverage AI for $R^2=0$

Politicians, appointees and senior officials with real authority, backed with capability, technical talent and AI tools, so the state delivers more, better, for less.

Democracia+ Strengthening political leadership across the ideological spectrum.

Groundwork: a clearly defined point of view, investment in system enablers, and our own operations to test and learn.

THREE NEEDLES TO MOVE BY 2031

WHAT CHILDREN AND YOUTH LEARN, AND WHERE IT TAKES THEM

5M

students learning measurably more

+ 25K young people earning more through higher education and tech careers

WHAT AND HOW THE STATE DELIVERS

25

public services or policies that reach more people, serve them better or cost less

together covering **100M people**, at national scale in every priority country

WHO SHAPES THE STATE

1,200

Democracia+ alumni in elected office

and **measurably better politicians** than their peers, across the political spectrum

TWO GATES — EVERYTHING WE DO ENTERS THROUGH ONE OF THEM

Create We build what does not exist yet: incubating new ventures and organizations, and investing early in founders and reformers to unlock innovation.

LatAm Scale We take what proves out to new countries — non-linearly, toward full adoption by governments and markets.

HOW WE WORK

- **Venture philanthropy.** Hands-on and selective, with venture discipline and philanthropic ambition.
- **No open calls.** We map and seek out the entrepreneurs and leaders who fit the strategy.
- **More than capital.** Our team and the connections we make are a key part of how we add value.
- **Evidence at the core.** We take measurement, evaluation and learning seriously: we track the needles and help partners build and learn from evidence.
- **Additionality.** We seek the points of maximum leverage for our investments — funding not just what works, but where we can really make a difference.
